Our services are characterized by high quality, safety and excellent service. Unilabs has provided diagnostic services to the private and public healthcare sector for more than ten years.

Senior Consultant Radiology/mammography to Southern Sweden

Radiological diagnosis of the breast within Unilabs

In Unilabs mammography is performed with modern, digital equipment and we invest in higher human competence enabling us to offer high quality and short waiting times.

Our goal is to offer a complete diagnostic opinion during one single occasion.

On assignment of the public healthcare of the Southern Region, Unilabs is responsible for all mammography in Scania (Southern Sweden) on nine locations in the region. Unilabs is now looking for an experienced radiologist with genuine mammography competence in order to reinforce the team further, primarily for duty on the unit in the city of Helsingborg. On the unit for breast diseases, two full-time doctors are working in a team consisting of 14 co-workers. A total of 70 employees are working at Unilabs in the region.

In Helsingborg you work in close cooperation with the department of breast surgery and was one of the first multiprofessional units in Sweden which has got an excellent reputation within the discipline.

The unit in Helsingborg:

- Approximately 35.000 mammography screenings per year.
- Clinical investigations with professional and fast process.
- Multidisciplinary conferences including mammography doctors, breast surgeons, pathologists and oncologists.
- Committed and professional colleagues and co workers characterizes the good atmosphere in the clinic!
- A "flat" organization enables short and simple distances to decisions
- 40 hour week – no on duties
- Generous possibilities for further education and INSET.
- An attractive salary and career opportunities for the right person.

Your qualifications:

- Specialist competence (preferably on the level of a Senior Consultant) within radiology with longer experience of mammography.
- Be in command of conventional methods within breast diagnostics with competence regarding ultrasound, biopsies and FNA (fine needle aspiration)
- A personality with a well balanced and compassionate way in the contact with patients and their relations
- Excellent ability to cooperate with colleagues and co workers.
